

POSITION: Sanitation Worker

REQUIREMENTS:

Must have a high diploma, GED or equivalent for this position.

- Documentation skills

JOB DESCRIPTION:

Sanitation Workers(s) report to Shift Production Supervisor. Responsibilities and preferred skill set, include but not limited to the following:

The sanitation worker is a member of our cleaning crew whose duties are to clean and sanitize processing equipment and processing areas of the plant, to meet Quality Control and Bacterial Standards delineated within FillTech USA. Members of the Sanitation crew are required to completely clean and sanitize the plant quickly and efficiently during relatively short time periods between the plant's normal production shifts, which typically requires that the sanitation worker work diligently and efficiently. The sanitation worker will also be working around large processing equipment in which chemicals will be used to complete the sanitation process. The sanitation worker must be able to work as a team along with other members of the crew, under stressful conditions, and be flexible and willing to perform varying tasks per the Sanitation Lead's instructions and in accordance with all safety guidelines mandated by the employer.

Clean and sanitize processing equipment and processing facilities.

- Prevent cross contamination of product, work-in-progress, product contact surfaces and product contact packaging during sanitation procedures
- Follow all company SSOPs
- Work safely with the chemicals used in the cleaning process
- Ensure all chemicals are used at proper concentrations
- Complete all sanitation and required SQF documentation
- Adheres to all company GMPs and Safety policies
- Wash and maintain buckets and containers and the sanitary state of the Washing and Drying Room
- Maintain all sanitation related equipment including but not limited to cleaning equipment and tools
- Other duties as assigned
